READING THE CROSS TABULATION TABLES

The cross tabulations found in this report are presented in a "banner table" format. Categories of respondents (e.g. "35-54 years old," or "Female") are listed across the top of each page (the "banner"). The questions asked in the survey are listed down the left margin. The figures in the cells are percentages based on the number of respondents in the category at the head of each.

Thank you very much. You have been very helpful.

MARGIN OF ERROR
405 registered voters, selected at random from registered voter lists in the State of Washington, were interviewed October 4-9 by live, professional interviewers. 44% of the interviews were conducted on cell phones. The margin of sampling error is ±5% at the 95% level of confidence. This means, in theory, that had this same survey been conducted 100 times, the results would be within ±5% of the results reported here at least 95 times.
