### READING THE CROSS TABULATION TABLES

The cross tabulations found in this report are presented in a “banner table” format. Categories of respondents (e.g. “35-54 years old,” or “Female”) are listed across the top of each page (the “banner”). The questions asked in the survey are listed down the left margin. The figures in the cells are percentages based on the number of respondents in the category at the head of each.

## READING THE CROSTABULATION TABLES

The crosstabulations found in this report are presented in a "banner table" format. Categories of respondents (e.g. "35-54 years old," or "Female") are listed across the top of each page (the "banner"). The questions asked in the survey are listed down the left margin. The figures in the cells are percentages based on the number of respondents in the category at the head of each

**NOTE:** The number of respondents in several of the cells is quite small, rendering the differences more likely to be due to chance variation than actual differences between the categories of respondent. Generally speaking, inferences should not be drawn where the number of cases is below 5 in each cell.
